Buddy at a glance

Buddy is a personal finance and life-admin app built for India. It tracks your money (expenses, income, budgets, savings, pocket money, accounts, loans), keeps your important documents in an encrypted vault, and runs your calendar, reminders and notes. **There are no Buddy servers**: everything is stored on your phone and in your own Google Drive and Google Sheets.

Key ideas

- **Your data, your Google account.** Records sync to a spreadsheet called **Buddy_Data** in a **Buddy** folder in your Drive. Buddy can only see files it created.
- **Encrypted on your phone.** Records, documents, receipts, backups and reports are encrypted with AES-256 before upload. They open only in Buddy with your passkey.
- **Works offline.** Everything is saved on the phone first and synced when you are online.
- **No ads, no tracking, no selling of data.**

The five tabs

Tab	What it is for
Home	Today at a glance: what's available this month, safe to spend today, quick actions, budgets, insights, upcoming bills and documents.
Expenses	Every expense, with search and filters. Shortcuts to Income, Budgets, Recurring payments, Savings and Reminders.
Docs	Your documents vault: Aadhaar, PAN, insurance, certificates… with expiry reminders.
Analytics	Charts and insights: trends, categories, month-on-month comparison, net worth.
Profile	All settings, plus Plan & Insights, Security, Data & Backup, Help.

© 2026 Prajwal Nair. All rights reserved.

1. Getting started

The first time you open Buddy, a short setup connects your Google account and prepares your private workspace.

Step	What happens
1. Welcome	Tap **Continue with Google**. (If setup was interrupted, it says Continue setup.)
2. Your data, your control	Read what Buddy accesses: only its own Drive folder (drive.file) and the Buddy_Data sheet. Tick the Privacy Policy and Terms boxes, then **Continue to Google authorization**.
3. Connect Google	Choose your Google account and allow Drive access.
4. Preparing your workspace	A live checklist creates (or reuses) the Buddy folder, sub-folders (Documents, Finance, Reports, Backup), the Buddy_Data spreadsheet, its tabs and document categories. Returning users skip straight in with "Welcome back".
5. A few details (optional)	Your name. **I am a student** → age, pocket money amount and frequency, rollover. Otherwise monthly salary and salary date. Savings target, monthly budget, currency, and fingerprint lock.
6. You're ready	Tap **Open Buddy**.

After setup

- Your documents vault is switched on automatically. Its first passkey is **your name without spaces**. Buddy shows a "Your documents are protected" card asking you to **set your own passkey**. Do it, because a name is easy to guess.
- **Student mode** replaces salary with Pocket Money across the app (no salary reminders or payday plan).

> **Use case:** A Pune engineering student ticks "I am a student", sets ₹3,000 monthly pocket money, and is tracking within two minutes.

© 2026 Prajwal Nair. All rights reserved.

2. Home screen and Quick Actions

Home shows your day and month at a glance. Pull down anywhere to sync.

Card (top to bottom)	What it shows
Greeting	Your name, the month, a sync indicator and the Search button.
Available · Month	Money available this month = income − spent − saved, with Income / Spent / Saved. The eye button hides all amounts (also on the widget).
Wallet / Pocket Money	Pocket money left and % used, or "Set up Pocket Money".
Safe to spend today	From your Payday plan: what you can spend today without touching bills or savings. Tap for the full plan.
Spend-free streak	"5 spend-free days in a row", shown from 2 days.
Quick Actions	Add, Scan, Calendar, Notes, Wallet, Pocket Money (see below).
Owed card	"To collect ₹X from Rahul & Priya", with overdue notes.
Today	Today's spending by category and the total, with + Add Expense.
Month spending	Spent vs budget with a status: Healthy / Near limit / Over budget.
Where it went	Top 4 categories this month.
Insights	Up to 3 short observations about your money.
Upcoming	Next 30 days: bills, reminders, documents expiring.
Important Documents	Starred documents. Tap to open, long-press for details.
Recent transactions	Your latest expenses, with See all.

Quick Actions

Button	What it does
Add	Opens a menu: Expense, Calendar entry, Income, Note, Document, Reminder, Budget, Savings Goal, Someone owes me, I owe someone, Transfer.
Scan	Scan receipt (photo becomes an expense receipt) or Scan document (photo goes into the vault).
Calendar · Notes · Wallet	Open those screens.
Pocket Money	Opens Pocket Money, or its setup if you have none.

Use case: Morning chai: open Buddy, glance at "Safe to spend today ₹420", tap Add → Expense to log the ₹20 chai.

© 2026 Prajwal Nair. All rights reserved.

3. Expenses

Record where your money goes, with categories, payment methods and receipt photos.

> **Where to find it:** Expenses tab, or Home → Quick Actions → Add → Expense, or the widget's + Expense button.

The Expenses list

- Header: the period, total spent and number of transactions. **+** adds an expense.
- Shortcut pills: Income, Budgets, Recurring, Savings, Reminders.
- **Search** by description, notes or amount; filter by **category chips**.
- **Filters**: This month, Last month, 90 days, All time or a custom date range; payment method.
- Grouped by day with day totals. **Long-press** an expense: Edit, Duplicate for today, Delete.

Adding an expense

Field	Details
Amount	Type the amount. On keypads with a comma, "12,50" means 12.50.
Category	Food, Travel, Shopping, Bills, Health, Education, Entertainment, Personal, Family, Subscriptions, Other (editable).
Description	What it was. Chips suggest your recent descriptions.
Source	Which money paid: **Pocket Money** (counts against your allowance), Main Funds, Savings, Other.
Payment method	UPI, Cash, Debit Card, Credit Card, Net Banking, Wallet, Other.
Paid from account	Appears once you have Accounts; updates that account's balance.
Receipt	Take a photo or choose one. Saved encrypted in your Drive.
Date, time & notes	Defaults to now.

- Saving can trigger a **budget alert** or a **Pocket Money warning** ("75% used"). Buddy never blocks an expense.

> **Use case:** Log a ₹180 Swiggy order paid by UPI, and snap the bill as a receipt in case of a refund dispute.

© 2026 Prajwal Nair. All rights reserved.

4. Income

Where to find it: Expenses tab → Income pill, or Wallet → Income, or Add → Income.

- **Monthly / Annual** views with arrows to change the period, totals, income by source and every entry.
- **Add income**: amount, source (Salary, Freelance, Bonus, Investment Income, Other; students also Pocket Money, Scholarship, Part-time Job), description, date, account received into, and a "Recurring income" label.
- **Automatic salary**: with "Recurring salary" on in Financial Settings, Buddy adds your salary on salary day each month (even offline). If you delete that month's salary, it isn't re-added.

Use case: A designer records ₹15,000 from a freelance client under "Freelance" to see side income separately.

5. Budgets

Where to find it: Profile → Financial Settings → Monthly Budget, or Expenses → Budgets, or tap the month spending card on Home.

- One **overall** budget for all spending plus optional **per-category** budgets.
- Each shows spent / limit, % used, status (**Healthy**, **Near limit**, **Over budget**) and what's left.
- **Repeat**: every month, or this month only (overrides the monthly one).
- **Roll over unused budget**: leftover carries to next month; overspending never does.
- **Warning level** (default 80%, set 50–100% in Financial Settings). Buddy notifies you once per month when you reach it and when you go over.

Use case: Set a ₹6,000 Food budget with rollover: spend ₹5,200 in October and November's Food budget becomes ₹6,800.

© 2026 Prajwal Nair. All rights reserved.

6. Savings goals

Where to find it: Expenses → Savings, Wallet → Savings, or Add → Savings Goal.

- Create a goal with a name, target amount, optional target date and "Already saved".
- Buddy works out **how much to save each month** ("Save ₹2,500 each month for 8 months").
- **Add money** / **Withdraw** with date and note; full history. Goals show "Reached" when complete; archive old ones.

Use case: "Goa trip" goal: ₹25,000 by December. Every payday, Add money ₹3,000 and watch the progress bar.

7. Wallet and Pocket Money

Wallet is your money hub. Pocket Money is a spending allowance, made for students but useful for anyone.

Where to find it: Home → Wallet card or Quick Actions → Wallet / Pocket Money. Settings: Pocket Money → settings icon.

- **Wallet**: total available, the Pocket Money card, and tiles for Income, Expenses, Savings, Budgets, Accounts, Loans & IOUs.
- **Pocket Money screen**: remaining amount, reset date, % used, spent today, **recommended per day** vs your current average, and a pace pill (On track / Above pace / Exhausted).
- **Only expenses with source "Pocket Money" reduce it.**

Setting	Options
Amount & frequency	Daily, Weekly (choose reset weekday), Monthly (reset date 1–31), or Custom (every N days). Start date.
Leftover money	**Roll over** to the next period · **No rollover** · **Move to Savings** (pick a goal) · **Ask every period**.
Warning	Warn at 50, 75 (default), 90 or 100% used. Never blocks spending.
Track Pocket Money	Pause tracking without losing settings.

Use case: A hostel student gets ₹500 every Monday; leftovers move automatically to a "New phone" savings goal.

© 2026 Prajwal Nair. All rights reserved.

8. Accounts and transfers

Where to find it: Wallet → Accounts.

- Add accounts: Bank, Cash, UPI, Card, Wallet, Other, with an opening balance (or amount owed for a credit card).
- Balances update automatically from linked expenses, income, transfers and loans.
- **Transfer** money between two accounts. A transfer is not counted as income or spending.
- Account detail shows all activity. Archive an account to hide it from pickers while keeping its history.

Use case: Move ₹5,000 from HDFC Savings to your Paytm Wallet before a trip, and both balances stay correct.

9. Loans, IOUs and “Owed to me”

Keep track of money friends owe you, and money you owe them, without awkward reminders.

Where to find it: Wallet → Loans & IOUs, the Owed card on Home, or Add → Someone owes me / I owe someone.

- **Add**: amount, person (recent names suggested), date, optional due date (In a week / 2 weeks / a month), account, and “What for?” (Food, Movie, Travel, Rent, Shopping, Gift, Cash).
- **They owe me / I owe** views with totals, overdue count and one card per person with a progress ring and due chip.
- **Remind** (WhatsApp or any app): choose a tone (Friendly, Polite, Firm), edit the message, and optionally add a **UPI pay link** (see section 11).
- **Got money / Paid back**: enter the amount (All / Half chips). It is applied to that person’s oldest items first. Fully settled shows a celebration.
- **Notifications**: for money owed to you, the evening before, the morning of the due date, and a follow-up 3 days later.

Use case: After a ₹1,200 movie night, add “Rohan owes me ₹400 for Movie”, then send a friendly WhatsApp nudge with a one-tap UPI link.

© 2026 Prajwal Nair. All rights reserved.

10. Recurring payments and the subscription finder

Where to find it: Expenses → Recurring, or Profile → Plan & Insights → Subscriptions & bills.

- **Monthly commitment**: the total of all active recurring payments per month.
- Add rent, EMIs, insurance, recharges and subscriptions: amount, name, frequency (Daily, Weekly, Monthly, Yearly, every N days), next due date, category, payment method, optional **payee UPI ID**.
- Tap a payment: **Pay now** (if it has a UPI ID), **Mark paid** (records the expense and moves to the next due date), Edit, Pause/Resume, Delete.
- Monthly payments keep their day: a bill due on the 31st falls on the 30th in shorter months.
- Notifications at 7 PM the day before and 9 AM on the day, with a **Mark paid** button right in the notification.

Subscription finder

Buddy scans your past expenses for charges that repeat at a steady interval and amount, and lists them under **Possible subscriptions** at the top of the screen.

Pattern	How Buddy recognises it
Weekly	At least 4 charges, about 7 days apart
Monthly	At least 3 charges, 26–35 days apart
Yearly	At least 2 charges, about a year apart
Always	Same merchant, amount within ±15%, still active recently, not already tracked

- **Track it** turns it into a recurring payment with the next due date predicted. **Not a subscription** hides it for good.

Use case: Buddy spots ₹649 to Netflix every month and ₹299 Jio every 28 days. Track both, and cancel the gym pass you forgot about.

© 2026 Prajwal Nair. All rights reserved.

11. Pay now and Request money (UPI)

Buddy opens your own UPI app with the details filled in. You confirm with your UPI PIN there. Buddy never sees your PIN and never moves money.

Pay now: paying a bill

Step	What to do
1. Add the payee's UPI ID once	Recurring payment → Edit → **Payee UPI ID** (e.g. landlord@oksbi). For a one-off: Calendar → + → Payment → Payee UPI ID.
2. Tap Pay now	On the bill: **Pay now**. Your UPI apps (GPay, PhonePe, Paytm, BHIM…) open with the name and amount filled in.
3. Pay in your UPI app	Enter your UPI PIN as usual.
4. Come back to Buddy	Buddy asks **"Did the payment go through?"**. Tap **Yes, mark as paid** to record it (and the expense).

Request money: getting paid back

Step	What to do
1. Add your own UPI ID once	Profile → Personal Information → **Your UPI ID**.
2. Open the person	Owed to me → tap the person → **Send a reminder**.
3. Keep "Add a UPI pay link" on	The message gets "Pay ₹500 by UPI to you@bank, or tap: upi://pay…".
4. Send on WhatsApp	They tap the link and their UPI app opens with your UPI ID and the exact amount.

Use case: Rent day: tap Pay now on "Rent", pay ₹18,000 in GPay, come back, tap Yes. The expense is recorded and next month's rent is scheduled.

© 2026 Prajwal Nair. All rights reserved.

12. Bank alerts import (Gmail)

Pay by UPI anywhere and Buddy writes it down for you, from the alert emails your bank already sends.

Where to find it: Profile → Data & Backup → **Bank alerts import** → turn on Gmail import.

Step	What happens
Permission	Google asks you to allow read-only Gmail access
First run	Imports the last 30 days
After that	Checks every 20 minutes when you open Buddy, or tap Check now
Which emails	Only from your bank's own email address, never your sent mail or drafts

- "Debited" becomes an **expense** (UPI, category guessed from the merchant, e.g. Swiggy → Food). "Credited" becomes **income**.
- OTPs, collect requests, failed and future (mandate) debits are ignored.
- **No double entries:** each payment is added once, matched by its UPI reference. A deleted import stays deleted.
- Emails are read on your phone. Only the transaction is saved, never the email.
- Works with HDFC, ICICI, SBI, Axis, Kotak, Yes, IDFC, IndusInd, PNB, Bank of Baroda, Canara, Union, Federal, AU, Paytm, Airtel and more.
- Turn on your bank's **email alerts** (in net banking or the bank app) so every UPI payment sends an email.

Good to know: Buddy doesn't read SMS. Android blocks downloaded apps that can read SMS, to protect against fraud. Gmail import shows a "Google hasn't verified this app" screen (tap Advanced → Go to Buddy) and is limited to 100 users until Google verifies Buddy.

Use case: Every PhonePe payment from your SBI account appears in Buddy as an expense, without typing anything.

© 2026 Prajwal Nair. All rights reserved.

13. Payday plan and “Safe to spend”

Where to find it: The “Safe to spend today” card on Home, or Profile → Plan & Insights → Payday plan. (Not shown in student mode.)

Line	Meaning
Income this period	Income since your last payday, or your expected salary until it arrives
− Spent so far	All expenses since payday
− Bills still due	Recurring payments and payment reminders due before the next payday (overdue ones included)
− Savings to set aside	Your monthly savings target (more, if you already saved more)
= Safe to spend	Spread evenly over the days left: “about ₹710 a day”

- **Left today** is fixed at the start of the day, so it only goes down by what you actually spend today.
- Set salary, salary date and savings target in Profile → Financial Settings.

Use case: With ₹50,000 salary, ₹18,000 of bills and a ₹10,000 savings target, Buddy shows about ₹700/day, and you know a ₹2,000 dinner means a lighter week.

14. Spend-free streaks

- A **spend-free day** is a day with no optional spending. Bills, health, education, subscriptions and scheduled payments don’t count against you.
- See your **current streak**, **best streak** (last 90 days) and spend-free days this month on the Payday plan; Home shows “N spend-free days in a row” (with a flame) from 2 days.

Use case: Try a “no-spend week”: keep the streak alive by cooking at home and skipping impulse shopping.

© 2026 Prajwal Nair. All rights reserved.

15. Money story

Where to find it: Profile → Plan & Insights → Money story. Choose this month so far or last month.

Card	What it shows
Your month	Total spent, number of expenses, and % more or less than last month
Where most of it went	Top category and its share
Your favourite spot	The place you paid most often, with visits and total
Biggest day	The date you spent the most
Spend-free days	e.g. 12 of 31
Kept from your income	% of income not spent

- **Share (no amounts)** sends a line like "42% went on Food · 15% less spending than last month · 12 spend-free days", with percentages and counts only, so it's safe to post.

Use case: On the 1st, swipe through last month's story and share your spend-free streak with friends.

16. Tax year summary (India)

Where to find it: Profile → Plan & Insights → Tax year summary.

- Financial year April–March (this year or last): total income, expenses, money moved to savings, and income by source.
- **Worth checking at tax time**: found by keywords in your expenses: rent (HRA/80GG), health insurance (80D), life insurance (80C), PPF/ELSS/NPS (80C/80CCD(1B)), tuition (80C), medical (80D/80DDB), donations (80G), education loan (80E).
- **Share as PDF** for your CA. It is a pointer for ITR time, not tax advice.

Use case: In July, open last year's summary, share the PDF with your CA, and stop hunting for LIC and rent receipts.

© 2026 Prajwal Nair. All rights reserved.

17. Calendar and reminders

One calendar for notes, reminders, bills, salary, weekend work, events and tasks, with notifications and optional phone-calendar sync.

Where to find it: Home → Quick Actions → Calendar, Home → Upcoming, or Profile → Calendar & Reminders.

- Views: **Month, Week, Day, Upcoming** (Today, Tomorrow, 7 days, 30 days, Overdue). Swipe to change period; tap a date to add.
- Filters: All, Notes, Reminders, Payments, Salary, Weekend Work, Tasks, Events, Pending, Completed. Search titles.
- Also shows recurring payments, document expiries and paydays.

Entry type	Special fields
Note	Category, description, link a document
Reminder	Time, priority (Low/Medium/High)
Payment Reminder	Amount, payee, payee UPI ID (for Pay now), category, payment method
Salary / Work Reminder	Salary month; remind 1/3/7/14 days before or on salary day
Weekend Work Log	Hours or start/end time, company or project, compensation, salary period, remind before payday
Personal Event	All-day or times, end date, location
Task	Due date, priority

- **Notifications**: at the time, 5 / 15 / 30 min, 1 hour, 1 day before, or custom (up to 30 days). **Repeat**: daily, weekly, monthly, yearly or every N days.
- **Add to phone calendar**: also adds the entry to your Google Calendar on the phone (the account you sign in with), and the confirmation names the calendar used.
- Notification buttons: payments have **Mark paid** and **Snooze 1 hour**; tasks and reminders have **Done** and **Snooze**.
- **Weekend Work** summary: days and hours worked per salary month, and a reminder to check they were paid.
- **Reminders list** (Expenses → Reminders): quick one-line reminders with repeat, tick to complete.

Use case: Log a Saturday office shift as Weekend Work; 7 days before payday, Buddy reminds you to check it was included in your salary.

© 2026 Prajwal Nair. All rights reserved.

18. Notes

Where to find it: Home → Quick Actions → Notes, or Add → New Note.

- Google Keep-style grid with Pinned and Others, and search.
- No Save button: notes **save automatically** as you type. An empty note is discarded.
- Pin, colour (Yellow, Green, Blue, Pink, Purple) and delete. Notes sync to your Buddy_Data (encrypted).

Use case: Keep the Sunday DMart grocery list, pinned to the top.

19. Documents vault

Where to find it: Docs tab. Add with + or Quick Actions → Scan → Scan document.

- Categories: Identity, Education, Career, Finance, Insurance, Vehicle, Travel, Personal, Other (editable). Search and filter by category.
- **Add**: choose a file (PDF, image, any document) or scan with the camera; name and icon; issue and expiry dates; **Important** pins it to Home.
- **Expiry reminders**: 90, 60, 30, 15 and 7 days before (default), or your own days. “Needs attention” lists documents expired or expiring within 90 days.
- Document detail: open, share, star, rename, move category, delete (to Drive trash, recoverable for 30 days).
- **Fingerprint lock**: Docs asks for your fingerprint, face or phone PIN each time you open it (30-second grace). Turn it off in Profile → App Lock.

Use case: Store Aadhaar, PAN, driving licence and car insurance; get reminded 30 days before the insurance expires; show the licence at a checkpoint in seconds.

© 2026 Prajwal Nair. All rights reserved.

20. Encryption, passkey and recovery code

Where to find it: Profile → Security → Documents vault & passkey.

- Everything Buddy uploads (records, documents, receipts, backups, reports) is encrypted on your phone with **AES-256**. In Drive, files appear as **.buddy** files.
- **Passkey**: at least 8 characters with letters and numbers. Change it any time. Files don't need re-encrypting.
- **Recovery code** (XXXX-XXXX-XXXX-XXXX-XXXX-XXXX): the only way back in if you forget your passkey. Write it down. Nobody, including the developer, can recover your files without it.
- **Unlock with fingerprint** on this phone; **Lock now**; **Encrypt existing files** for older uploads.

Use case: New phone? Sign in with Google, enter your passkey once, and everything decrypts.

21. Emergency kit

One locked file for someone you trust, in case something happens to you.

Where to find it: Profile → Security → Emergency kit.

- Buddy creates a **16-character emergency code**. Write it down and give it to the person separately (in person or on paper).
- Add a message ("My insurance papers are in the blue file…"), and choose what to include: bank accounts and wallets (names only), regular payments, money owed, and up to 15 MB of documents.
- **Create and share** makes one file (an HTML page). It opens in **any web browser, even offline**, only with the code. Buddy keeps no copy.

Use case: Give your spouse a kit with life and health insurance papers by WhatsApp, and the code on a paper slip in the cupboard.

© 2026 Prajwal Nair. All rights reserved.

22. Analytics and insights

Where to find it: Analytics tab.

- Periods: 7 Days, 30 Days, This Month, Last Month, This Year, Custom.
- Summary: income, expenses, savings, available, average per day, transactions, savings rate.
- Charts: spending trend, category donut, top categories, **this month vs last month** per category, and **net worth** over 6 months (accounts + owed to you − you owe).
- Insights (rule-based, no AI): category jumps, daily average, budget projection, savings, weekend spending, “no income recorded”.

Use case: Notice Food is up 30% vs last month, and set a Food budget for next month.

23. Search

- Tap the magnifier on Home. Searches expenses (including exact amounts), documents, reminders, recurring payments, income and savings goals.

Use case: Type “1499” to find which month you bought those earphones.

24. Home-screen widget (Android)

Where to find it: Long-press your phone’s home screen → Widgets → Buddy, and drag it out.

- Shows **Safe to spend today** (or Spent today), spent today and your streak, with a **+ Expense** button.
- Updates when you add an expense or leave the app. Respects **Hide amounts**.

© 2026 Prajwal Nair. All rights reserved.

25. Profile and settings

Setting	What you can change
Personal Information	Display name, your UPI ID (for Request money).
Google Account & Devices	Signed-in account, permissions, this device; Log out, Disconnect Google, Delete account.
Financial Settings	Student mode, monthly salary, salary date, recurring salary, savings target, budget warning %, currency (INR, USD, EUR, GBP, AED, SGD), timezone, default payment method.
Manage Categories	Add, rename, re-icon or archive expense, income and document categories.
Calendar & Reminders	Phone calendar sync and which calendar, notification types, salary frequency and reminder, week start, default view and event length.
Notifications	Expense reminder (8 PM), budget alerts, payment reminders, document expiry, savings reminder (“pay yourself first”), salary reminders, custom reminders, daily summary (9 PM).
Appearance	Light / Dark / Auto, accent colour (Jade, Indigo, Amber, Graphite), headline weight, text colour, icon colour, high contrast.
Help & Support	Call or WhatsApp +91 86181 76469, email prajwalps2603@gmail.com, Privacy Policy, Terms.

Security

Setting	Details
App Lock	Ask for a PIN (4–6 digits) or fingerprint when opening Buddy. Without a Buddy PIN, your phone’s PIN or pattern always works, so you can never be locked out.
Auto Lock	Immediately, 1 minute (default), 5 or 15 minutes, Never.
Wrong PIN	After 5 wrong attempts Buddy waits 30 seconds, then longer each time (up to an hour), even if the app is restarted.
Fingerprint for Documents	Ask each time Docs or the vault page opens (on by default).

© 2026 Prajwal Nair. All rights reserved.

26. Sync, backup and your data

Feature	How it works
Sync	Automatic shortly after each change and when you open the app; pull down on Home to sync now. Works offline; the latest edit wins if two phones change the same thing.
Sync details	Profile → Data & Backup → Sync Now: status, Sync now, Download everything again, items waiting to upload, and error details.
Backup & Restore	Encrypted backups in your Drive: Create Backup, automatic Weekly or Monthly (default), and Restore a dated backup.
Export Data	Expenses CSV, Income CSV, a monthly PDF report and a monthly report CSV.
Storage	Google storage used, Buddy documents, reports and backups, and records cached on the phone.
Buddy Workspace	Health check of your Drive folders and spreadsheet; **Repair** recreates only what is missing.

Leaving or starting over

Action	What happens
Log out	Removes Buddy's data from this phone only. Everything stays in your Google account.
Disconnect Google (deactivate)	Removes Buddy's Google access and clears this phone. Your data stays in Drive; sign in again to reactivate.
Delete account	Moves your whole Buddy folder to Google Drive trash (deleted for good after 30 days), deletes phone-calendar events Buddy created, revokes access and clears this phone. You type DELETE to confirm.

Privacy in one paragraph

Buddy has no servers. Your records live on your phone and in your own Google Drive and Sheets, encrypted with your passkey. Buddy can only see the files it creates. Buddy never reads your SMS. Gmail is read only if you turn on bank alerts import, on your phone, for UPI alerts only. Emails are never stored. There are no ads and no tracking, and your data is never sold or shared. Full policy: **prajwalps2603.github.io/Buddy/privacy.html**.

Ownership and licence

Buddy is owned by Prajwal Nair. All rights reserved. Buddy, including its code, design, logo, name, content and updates, is protected by Indian and international copyright and trade mark law. The app is **licensed, not sold**: you may install and use the official app on your own devices for personal, non-commercial use. You may not copy, modify, sell, resell, share, upload, distribute, rebrand or reverse engineer it, or claim it as your own creation, and no one can buy or transfer ownership of Buddy except its owner.
